

Dr. Umakant Rapol is a Ph. D. from Indian Institute of Science, Bangalore-India from Prof. Vasant Natarajan's group. He has a post-Doctoral research experience from leading European universities in France and Austria. After his post-doctoral work, he spent around four years in Industrial Research and Development in General Electric Global Research, Bangalore working in the development of optical devices and sensors for biotechnology and power generation. Since, 2009, He has been a faculty member at the Indian Institute of Science Education and Research Pune. He is currently Professor of physics at IISER. Pune, Physics Department, Pune - India. Dr. Rapol's research interests are in the area of Atomic Physics and Quantum optics. He has an active research group at IISER – Pune, working in the areas of Ultra-cold atoms and ions for precision Optical Metrology, Quantum Information processing and Quantum optics and in Quantum technologies ranging from Quantum computing to Quantum sensors.
