

Varun Raghunathan is an Associate Professor at the ECE department, Indian Institute of Science, Bangalore, India. His research group works in the areas of nonlinear optics, integrated nano-photonics, bio-photonics, optical and quantum communications. He obtained his Ph.D. degree in electrical engineering from the University of California Los Angeles, in 2008, working on silicon photonics. Previously, he was a Postdoctoral Scholar with the chemistry department, University of California Irvine, working in the area of nonlinear optical microscopy. Before moving to India in 2016, he was working as a Research Scientist at Agilent Research Laboratories, Santa Clara, CA, USA working in the areas of infrared micro-spectroscopy and optical system development for clinical pathology.
